

Christian Rhomel Aguila

AI Automation Specialist/Developer

(+639)961-549-1218 | christianrhomel@gmail.com | github.com/christianaguila | linkedin.com/in/christianrhomel

PROFESSIONAL SUMMARY

AI Automation Developer with 3 years of enterprise analytics experience at Globe Telecom and Solaire Resort. Currently building and shipping production-grade AI automation systems — REST APIs, webhooks, LLM integrations, and end-to-end workflow orchestration using n8n. My analytics background gives me a rare edge: I don't just connect APIs, I understand the business problem, the data behind it, and the outcome that matters.

AUTOMATION PROJECTS

- **AI Social Media Content Calendar Generator** Intake form triggers n8n, Claude API generates a full monthly content calendar with captions, hashtags, and CTAs, Google Slides API automatically builds the presentation deck, and Gmail delivers the link to the client. Saves agencies 3-5 hours per client per month. Stack: n8n, Claude API, Google Slides API, Google Forms, Gmail
- **YouTube Comment Bot** Monitors a YouTube channel every 15 minutes, Claude AI classifies each comment, drafts a reply, and sends a Slack notification for team approval before posting. Includes deduplication so no comment is processed twice. Stack: n8n, YouTube Data API, Claude API, Slack, Google Sheets
- **AI Lead Capture & Follow-up System** Google Form submission triggers instant lead qualification — Claude scores urgency, generates a personalized email response, sends SMS via Twilio, and logs everything to Google Sheets. Stack: n8n, Claude API, Google Forms, Gmail, Twilio, Google Sheets
- **Automated Client Assessment and Report Delivery Pipeline** Stripe payment triggers a Google Form link, responses are sent to Claude API which generates a personalized report and emails it automatically. Stack: n8n, Stripe webhooks, Google Forms, Claude API, Gmail
- **AI Customer Support Bot** Monitors Gmail inbox, classifies incoming emails using Claude AI (refund, complaint, inquiry, spam), generates professional HTML replies, and routes to auto-send or manual review based on configurable mode toggle. Stack: n8n, Gmail API, Claude API, Google Sheets
- **AI-Powered Job Matching System** Fetches live job listings from RSS feeds daily, scores each for relevance using Claude AI, logs results to Google Sheets, and delivers a morning digest email. Includes deduplication logic. Stack: n8n, Claude API, Google Sheets, Gmail
- **Automated AI Sales Reporting Engine** Reads sales data from Google Sheets on a daily schedule, sends to Claude API which generates an executive HTML report with observations and recommendations, delivered via Gmail automatically. Stack: n8n, Claude API, Google Sheets, Gmail

SKILLS

Automation & AI: n8n (self-hosted on VPS), Claude API, OpenAI API, REST APIs, webhooks, Google Workspace APIs (Sheets, Slides, Drive, Gmail), YouTube Data API, Stripe, Twilio, Slack

Programming: Python (SQLAlchemy, pyodbc, Scikit-learn), JavaScript, SQL

Data & BI: Snowflake, Databricks, Power BI, Looker, Tableau, BigQuery, SAS

ETL & Engineering: Data pipeline automation, ETL design, data cleaning, relational databases

WORK EXPERIENCE

Marketing Analytics Manager – Marketing Analytics, Globe Telecom

Dec 2025 – Current

- **Reduced monthly reporting cycle time by 70% (from 6-8 hours to 2 hours)** by optimizing Snowflake SQL scripts and restructuring backend data architecture for key marketing KPIs (ARPU, CLV, subscriber counts, reload rates), enabling faster decision-making on customer acquisition and retention strategies.
- **Eliminated 4-6 hours of manual data entry monthly** by automating event survey data ingestion from Google Sheets using AppScript, transforming static monthly snapshots into real-time dashboard updates that improved response time to customer satisfaction insights.
- **Enhanced analytical flexibility for stakeholders** by adding 5+ dimensional filters to core marketing KPI dashboard, enabling marketing teams to slice data by customer segment, campaign type, and time period—improving self-service analytics adoption and reducing ad-hoc data requests by 30%.
- **Standardized marketing KPI definitions** (ARPU, CLV, reload rates) across SQL data pipelines and Looker dashboards, reducing cross-functional discrepancies and establishing a single source of truth for monthly performance reviews with marketing leadership.

Senior Analyst – Strategic Marketing, Solaire Resort

Aug 2024 – Current

- **Reduced campaign evaluation time by 60%** (from 15-20 hours to 6-8 hours per major campaign) by automating ETL pipelines using Python, SQL, and Databricks—consolidating customer, transaction, and promotional data across 20M+ records into standardized analytical frameworks.
- **Transformed comp approval process from manual Excel workflow to real-time automated system** using Python (SQLAlchemy, pyodbc) for data pipeline automation, SQL for real-time customer data extraction, and Power BI for instant eligibility calculations—**reducing approval time by 93% (45 minutes → 2 minutes)** and ensuring consistent application of profitability rules across casino floor operations.
- **Accelerated executive decision-making** by building Power BI dashboards tracking real-time marketing KPIs, campaign performance, and customer lifecycle metrics—used daily by C-suite leadership (SVP Casino Marketing, VP Strategic Marketing, VP Player Development) for strategic planning and budget allocation.
- **Saved ₱8-12M annually** by identifying and recommending discontinuation of 3 underperforming casino campaigns where A/B testing revealed zero incremental revenue lift versus control groups, validated across multiple profitability tiers and customer lifecycle segments.
- **Improved targeting precision by 15-20%** by supporting A/B test design and post-campaign evaluation across control vs. test groups, identifying which customer segments (profitability tier, lifecycle stage, loyalty level) responded most favorably to specific promotional offers.
- **Improved campaign ROI by 15-20%** by developing proforma forecasting models that accurately predicted customer participation rates, incremental revenue, and lifetime value uplift—enabling marketing leadership to reallocate ₱50M+ annual promotional budget toward higher-performing customer segments.
- **Enhanced marketing effectiveness** by conducting statistical analysis on customer response patterns and ROI drivers, translating findings

into actionable recommendations that shaped ₱200M+ annual campaign strategy and customer engagement initiatives.

Analyst – Strategic Marketing, Solaire Resort
Jul 2023 - Aug 2024

- **Reduced campaign analysis turnaround by 50%** (from 4-5 days to 2 days) by building automated SQL extraction workflows and Power BI dashboards that measured visitation lift, reinvestment rates, and segment profitability—enabling faster go/no-go decisions on ₱30-50M in quarterly promotional spend.
- **Improved targeting precision by 15-20%** by supporting A/B test design and post-campaign evaluation across control vs. test groups, identifying which customer segments (profitability tier, lifecycle stage, loyalty level) responded most favorably to specific promotional offers.
- **Enhanced marketing effectiveness** by conducting statistical analysis on customer response patterns and ROI drivers, translating findings into actionable recommendations that shaped ₱200M+ annual campaign strategy and customer engagement initiatives.
- **Ensured data accuracy across enterprise analytics** by managing complex SQL queries, reconciling multi-source datasets (transactional, customer, promotional), and validating data integrity—preventing ₱2-5M in potential budget misallocations due to reporting errors.
- **Improved cross-functional collaboration** by translating technical analytical findings into clear business insights for non-technical stakeholders in marketing, operations, and finance—reducing miscommunication and accelerating campaign execution cycles by 20-30%.
- **Established foundational reporting infrastructure** by building and maintaining 5+ Power BI dashboards tracking marketing KPIs, customer engagement metrics, and campaign performance—increasing data visibility and self-service analytics adoption across strategic marketing teams.

EDUCATION

Technological University of the Philippines

Aug 2018 – Aug 2022

Manila, Philippines Bachelor of Science in Electronics Engineering

Relevant Coursework: Engineering Data Analysis, Fundamentals of ICT, Computer Programming 1&2, ECE Elective 1&2

LICENSES & CERTIFICATIONS

- **Licensed Electronics Engineer (PRC, Philippines, 2023)**
- **Google/Data Analytics Professional Certificate (2022)**
- **Bayan Academy/Intermediate Data Analytics (2022)**
